

Technical Co-founder

Nordseed · Copenhagen · Equity: 25 to 35%

Fintech

Full-time

Hybrid · Copenhagen

No salary · Equity only

Co-founder title

About Nordseed

Nordseed is a Danish equity crowdfunding platform that lets anyone invest in early-stage Danish startups from 100 DKK. Think Crowdcube, but Danish, cheaper, and with MobilePay. A live prototype is available at nseed.lovable.app.

The Market Opportunity

- New Danish law from January 2025 allows ApS companies to do equity crowdfunding for the first time
- No strong Nordic platform exists. Nordseed is the first mover in Scandinavia
- The European crowdfunding market is growing 15 to 20% annually

What You'll Own

You will build and own the entire technical platform from scratch. This is a true CTO role from day one, not a senior developer position.

- Next.js frontend and Supabase/PostgreSQL backend
- Stripe and MobilePay payment integration with escrow logic
- MitID verification and KYC flows
- Admin dashboard for due diligence and compliance reporting
- Architecture decisions. You own the tech stack

What We're Looking For

- Strong full-stack skills: Next.js, Supabase/PostgreSQL, REST APIs
- Experience building something in production, not just hobby projects
- Fintech or regulated product experience is a plus
- Based in Copenhagen or willing to meet regularly
- Equity-motivated. You want to own something, not just build it

What We Offer

25 to 35% equity

4-year vesting, 1-year cliff

Co-founder title	CTO from day one, not a hire
Real momentum	Prototype live, PRD written, 25+ founders contacted
Untouched market	First Nordic equity crowdfunding platform

Current Status

✓ Live prototype	nseed.lovable.app
✓ Full PRD written	v1.1, April 2026
